PROITBRIDGE
Strive For Better Future

Agentic AI Program Prerequisites

(Core AI / ML Terminologies You Must Know)

04 PILLARS | 80 TERMS

30 DAYS

PILLAR 01 · FOUNDATION

Python Programming

10 DAYS

STARTING POINT & MANDATORY COURSE

MUST-KNOW TERMS

- Variables & Data Types
- Control Flow
- OOP & Classes
- Virtual Environments
- Lambda Functions
- Generators
- File I/O & JSON
- Pandas
- Jupyter Notebook
- Git & GitHub
- Data Structures
- Functions
- Modules & Packages
- Comprehensions
- Decorators
- Exception Handling
- NumPy
- Matplotlib & Seaborn
- API Requests
- Slicing & Indexing

PILLAR 02 · CORE ML

Machine Learning

6 DAYS

CHAPTERS 1–9, 11
12 HOURS

MUST-KNOW TERMS

- Supervised Learning
- Reinforcement Learning
- Train / Test Split
- Classification
- Clustering
- Precision
- F1-Score
- ROC-AUC
- Overfitting
- Regularization
- Unsupervised Learning
- Features & Labels
- Cross-Validation
- Regression
- Accuracy
- Recall
- Confusion Matrix
- Class Imbalance
- Underfitting
- Feature Engineering

PILLAR 03 · DEEP LEARNING

Deep Learning

4 DAYS

CHAPTERS 01–07 & CHAPTER 10
8 HOURS

MUST-KNOW TERMS

- Neural Networks
- Activation Functions
- Optimizers
- Backward Propagation
- Epochs / Batch / LR
- Dropout
- CNN
- Pretrained Models
- Fine-Tuning
- SOTA Models
- Perceptron
- Loss Functions
- Forward Propagation
- Gradient Descent
- Hyperparameter Tuning
- Batch Normalization
- RNN / LSTM
- Transfer Learning
- SOTA Techniques
- Vanishing Gradients

PILLAR 04 · NLP

Natural Language Processing

10 DAYS

NEXT CHAPTER

MUST-KNOW TERMS

- Tokenization
- Lemmatization
- Bag of Words
- TF-IDF
- POS Tagging
- Word Embeddings
- Attention Mechanism
- Transformers
- Language Models
- Vector Embeddings
- Stemming
- Stop Words
- Count Vectorizer
- N-Grams
- NER
- Word2Vec / GloVe
- Self-Attention
- Encoder-Decoder
- LLMs
- Cosine Similarity

30 DAYS · ~1 MONTH

Setting the foundations strong

Before you begin building your Agentic AI career.
